

# GenAI-powered evaluation function at UNFPA

Strategy for leveraging the benefits of responsible and ethical generative artificial intelligence while minimizing risks

---

**Neha Karkara**

Team Lead, Communications, KM and AI  
UNFPA IEO

# The journey

1

## How did we begin?

AI use cases in evaluation

2

## What is our approach?

Key features of the Gen-AI powered evaluation strategy

3

## Where are we headed?

AI pilot in a centralized evaluation and inter-agency meta-synthesis

# 1

## How did we begin?

**Mapping use cases of AI tools**

**Needs assessment** across the evaluation lifecycle

**Solution exploration study**, based on UNFPA approved Google tools and platforms (Duet AI, Gemini)

# 5 prioritized use cases of AI tools

Information synthesis

Initial report writing

Inclusive dissemination

Evidence synthesis

Qualitative data analysis

# 2

## What is our approach?

### Strategy for Gen-AI powered evaluation function at UNFPA

- A pioneering strategy for leveraging the benefits of responsible and ethical GenAI while minimizing risks
- Draws on the AI use cases in evaluation
- Outlines a roadmap to optimize evaluation processes and products with ethical and responsible use of GenAI
- Focused on achieving greater efficiency, effectiveness, and timeliness in evaluations

### GenAI-powered evaluation function at UNFPA

Strategy for leveraging the benefits of responsible and ethical generative artificial intelligence while minimizing risks

April 2024

# Key features of the strategy

Provides a framework for recognizing and mitigating challenges and risks in GenAI use in evaluation, e.g.

Upholding data protection & privacy

Mitigating biases

Upholding accuracy & reliability

Transparency, explainability & accountability

Overreliance on GenAI

# Aligned to UNEG ethical principles for AI use in evaluation (Draft)

Do no harm

Privacy &  
Data Protection

Transparency &  
Accountability

Accuracy &  
Reliability

Fairness &  
Mitigation

Human-Centered  
Approach

Participation &  
Inclusiveness

Upholding Human  
Rights

# Strategic principles for leveraging GenAI in evaluation

Demand-driven approach for GenAI-powered evaluation

Diversification and innovation of GenAI tools

Upholding quality and credibility in evaluation

Maximizing the use of evaluation with GenAI

Adhering to an ethical and human rights-based approach to GenAI use in evaluation

Cultivating GenAI capacity in evaluation, especially in the Global South

# Implementation roadmap for GenAI-powered evaluation

- Phased approach to GenAI adoption and deployment
- Developing custom GenAI solutions for evaluation
- Change management and communication
- Iterative and adaptive approach to digital transformation
- Long-term sustainability of GenAI-powered evaluation effort

# 3

## **Where are we headed?**

### **Tool: AILYZE**

- **Pilot of AI use in evaluation of UNFPA strategic plan**
- **Pilot of AI use in an inter-agency meta-synthesis exercise**

# 1. Pilot of AI use in evaluation of UNFPA strategic plan

## Use case

Qualitative analysis of 75 CPDs over two strategic plans to determine:

- If strategic shifts and accelerators have been included in the current CPDs
- If there is an increased focus on the shifts and accelerators

## Tips for ethical use and risk mitigation

- Ethical AI use contractual clauses
- Human and AI collaboration
- Strong human oversight
- Managing subjectivity
- Data protection

## 2. Pilot of AI use in interagency meta-synthesis of evaluation reports on youth education and employment, to advance the UN Youth Strategy

### Use case

1. Report extraction – completed!
  - Keyword search to distil 1350 reports from evaluation databases of 46 UNEG agencies
  - AI analysis further extracted 250 reports
  - 97% accuracy based on human verification
  - Final dataset of 300 reports from 13 agencies, with manual addition
2. Coding and synthesis work – Underway

### Tips for ethical use and risk mitigation

In addition to the previous tips:

- Planning & aiding human verification: Report extraction aided by summaries of beneficiaries, interventions, key findings & verbatim quotes, supporting human check
- Inclusion criteria and analysis framework aligned for AI use

## Practical considerations for the evaluation manager

- Setting up a team with AI capacities
- Evaluation team's time in developing an analytical framework fit for AI use
- Upskilling: Training on prompt engineering
- Assigning adequate time for accuracy check
- Include AI disclaimer in report, explain AI use in methodology
- Keeping track of efficiency gain, to support scale up of the tool
